VALUE -ADDED COMPONENTS
5/8" DensGlass Sheathing

PROJECT SCOPE:

Fastwalls supplied 6" interior and exterior load-bearing steel stud wall panels including built up jambs and headers, based on an exterior-to-corridor load path.

SPEED TO MARKET:

Four storeys of floor panels were installed in just over 9 weeks. Flying the panels into place on the structure commenced on October 17, 2017 and was completed on December 21, 2017.

This project marked the first time Fastwalls was included in a project that used CorTek modular stair cores, which was a significant contribution to increased schedule savings.

PROJECT TEAM:

Lochsa Engineering, Cortek Systems, Ecospan Composite Floor System
